H-STEEL

COMPANY PROFILE

A global metal partner built for long-term cooperation

H-steel Co., Ltd. (H-STEEL) was established in 2015 and has been deeply engaged in the metal industry for many years. We specialize in production, processing and international trading across aluminum, galvanized steel and copper products.

A professional team and strong supply chain network support customers across Asia, the Middle East, Europe, Africa and America with reliable metal solutions.

EXPERIENCED EMPLOYEES

GLOBAL SUPPLY CAPABILITY

Reliable service from inquiry to delivery

Aluminum expertise, customization and quality control are aligned around every order.

01

Aluminum Expertise

Sheets, coils and foil rolls supported by experienced production, processing and export coordination.

02

Custom Solutions

Alloy, temper, surface treatment, processing, packaging and product specification tailored to the application.

03

Quality Assurance

Control from raw material selection and production through inspection, documentation and shipment.

Stable quality, competitive pricing and dependable service support repeatable global supply.

Three essential forms for aluminum supply

Lightweight, corrosion-resistant materials supplied for industrial processing and finished-product applications.

01 Aluminum Sheets Flat products for fabrication, transportation, architecture and machinery.

02 Aluminum Coils Continuous strip for forming, stamping, roofing, cladding and downstream processing.

03 Aluminum Foil Rolls Thin-gauge rolled products for packaging, insulation, heat exchange and lamination.

FLAT ALUMINUM PRODUCTS

Aluminum Sheets

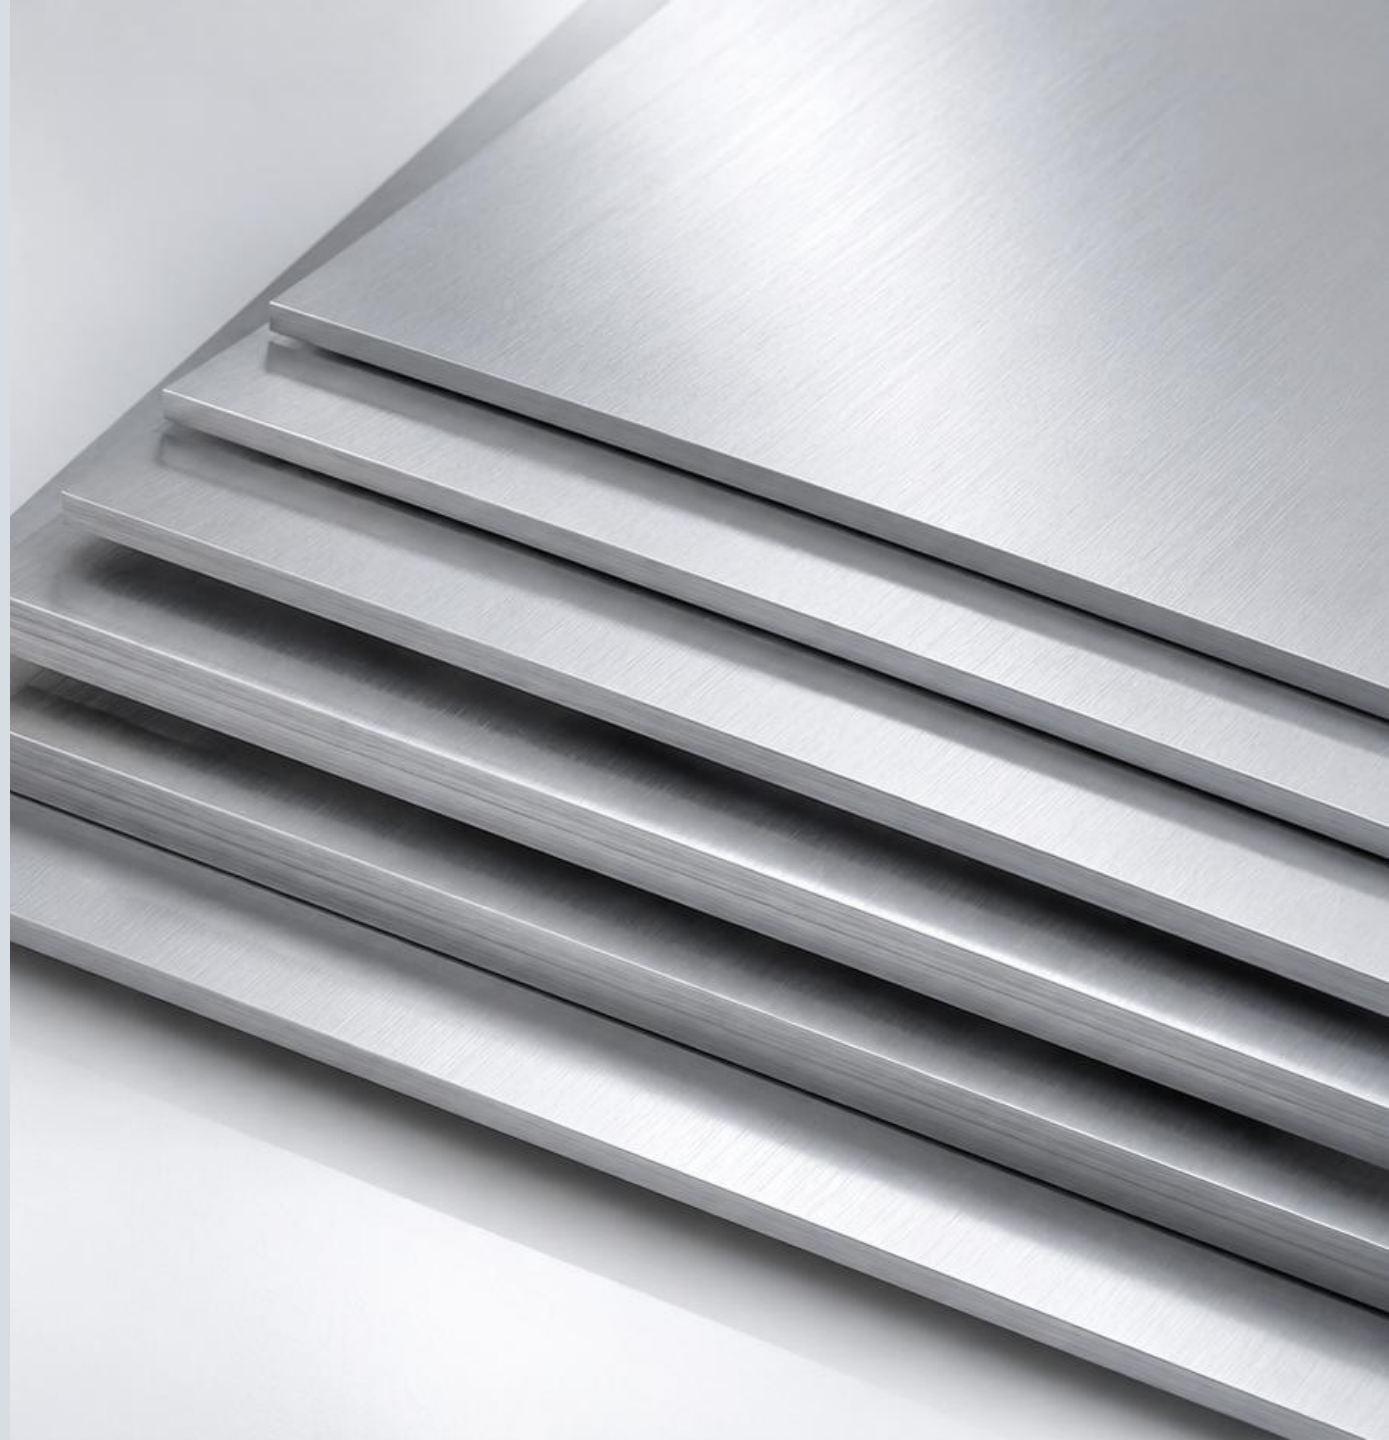

Lightweight flat products with consistent surface quality for fabrication and finished components.

-
- Stable flatness with clean mill-finish or treated surfaces
 - Good formability, corrosion resistance and workability
 - Alloy, temper, finish, processing, film and packaging options

APPLICATIONS

Transportation · Building facades · Machinery · General fabrication

CUSTOMIZATION SUPPORTED

ROLLED ALUMINUM PRODUCTS

Aluminum Coils

Continuous aluminum strip engineered for efficient forming, stamping and high-volume production.

-
- Consistent strip quality for stable downstream processing
 - Controlled surface and edge condition for reliable forming
 - Alloy, temper, slitting, coating, finish and packaging options

APPLICATIONS

Roofing · Cladding · Stamped parts · HVAC components

CUSTOMIZATION SUPPORTED

THIN-GAUGE ALUMINUM PRODUCTS

Aluminum Foil Rolls

Precision-rolled foil for flexible packaging, insulation, heat exchange and industrial laminates.

- Uniform winding and refined surface quality
- Suitable for forming, coating, laminating and converting
- Alloy, temper, surface treatment, winding and packaging options

APPLICATIONS

Flexible packaging · Insulation · Heat exchange · Industrial laminates

CUSTOMIZATION SUPPORTED

Built to your specification. Controlled at every step.

Our technical and quality teams align the product, process, inspection and packing plan before production.

CUSTOMIZATION

- Alloy and temper
- Surface finish and treatment
- Slitting, cutting and processing
- Protective film, coating and lamination
- Inspection and documentation
- Order-specific packaging and labeling

QUALITY CONTROL

01

Raw material selection

02

Production and processing

03

Inspection and certification

04

Packing and final delivery

International quality certifications and industry qualifications support dependable global supply.

YOUR GLOBAL METAL PARTNER

Let's build your next aluminum order together.

High-quality products, professional service and long-term cooperation for customers around the world.
