H-STEEL

COMPANY PROFILE

A global metal partner built for long-term cooperation

H-Steel Co., Ltd. (H-STEEL) was established in 2015 and has been deeply engaged in the metal industry for many years. We specialize in production, processing and international trading across aluminum, galvanized steel and copper products.

A professional team and strong supply chain network support customers across Asia, the Middle East, Europe, Africa and America with reliable metal solutions.

2015

ESTABLISHED

USD 7M+

ANNUAL SALES

100+

EXPERIENCED EMPLOYEES

Reliable service from inquiry to delivery

Quality, customization and responsive coordination are built into every order.

01

Broad Metal Expertise

Aluminum, galvanized steel and copper products supplied through one experienced international team.

02

Custom Solutions

Product grade, temper, surface treatment, processing, packaging and specification tailored to project requirements.

03

Quality Assurance

Control from raw material selection and production through inspection, documentation and shipment.

Our commitment: stable quality, competitive pricing and dependable service for repeatable global supply.

CORE COPPER PORTFOLIO

Four essential forms. One reliable source.

Built for electrical, thermal, mechanical and general industrial applications.

01

Copper Plate

Flat products for fabrication, machining and conductive components.

02

Copper Coil

Continuous strip for stamping, forming and high-volume processing.

03

Copper Tube

Straight and coiled tube for heat transfer and fluid systems.

04

Copper Rod

Solid bar stock for machining, electrical and structural use.

05

Copper Wire

Copper wire for electrical wires, cables, and electronic components.

FLAT COPPER PRODUCTS

Copper Plate

Clean, consistent flat products for conductive parts, fabrication and precision processing.

- Stable flatness and uniform mill-finish surface
- Good conductivity, formability and machinability
- Grade, temper, finish, processing and packaging options

APPLICATIONS

Electrical components · Busbars · Heat exchangers · Industrial fabrication

Customizable dimensions

ROLLED COPPER PRODUCTS

Copper Coil

Continuous copper strip designed for efficient stamping, forming and automated production.

- Consistent strip quality for stable downstream processing
- Controlled edge condition and clean reflective surface
- Grade, temper, slitting, finish and packaging options

APPLICATIONS

Terminals · Stamped parts · Shielding · Electrical components

Customizable dimensions

TUBULAR COPPER PRODUCTS

Copper Tube

Straight and coiled copper tubing for heat transfer, fluid systems and installation flexibility.

- Straight tube and coiled tube supply formats
- Clean bore, smooth surface and reliable formability
- Grade, temper, surface, end protection and packaging options

APPLICATIONS

HVAC · Refrigeration · Heat exchangers · Fluid lines

Customizable dimensions

COPPER BAR PRODUCTS

Copper Rod

Solid copper bar stock with reliable conductivity and machining performance for industrial parts.

- Round, square, hexagonal and special-profile options
- Suitable for machining, fabrication and conductive parts
- Grade, temper, profile, surface, cutting and packaging options

APPLICATIONS

Connectors · Valves · Fasteners · Precision-machined parts

Customizable dimensions

COPPER BAR PRODUCTS

Copper Wire

Fine-gauge copper wire with excellent electrical conductivity, flexibility and reliable processing performance for electrical and industrial applications.

- Available in red copper, brass and other copper alloy options
- Fine, uniform wire with good ductility and stable conductivity
- Grade, temper, surface, winding, spool and packaging options

APPLICATIONS

Electrical cables · Electronic components · Motors · Transformers

Customizable dimensions

Built to your specification. Controlled at every step.

Our technical and quality teams align the product, process, inspection and packing plan before production.

CUSTOMIZATION

- Material grade and temper
- Surface finish and treatment
- Processing and special profiles
- Inspection and documentation
- Protective packaging and labeling
- Order-specific product specifications

QUALITY CONTROL

- 01 **Raw material selection**
- 02 **Production and processing**
- 03 **Inspection and certification**
- 04 **Packing and final delivery**

International quality certifications and industry qualifications support dependable global supply.

YOUR GLOBAL METAL PARTNER

Let's build your next copper order together.

High-quality products, professional service and long-term cooperation for customers around the world.
