H-STEEL

COMPANY PROFILE

A global metal partner built for long-term cooperation

Hegang Metal Co., Ltd. (H-STEEL) was established in 2015 and has been deeply engaged in the metal industry for many years. We specialize in production, processing and international trading across aluminum, galvanized steel and copper products.

A professional team and strong supply chain network support customers across Asia, the Middle East, Europe, Africa and America with reliable metal solutions.

EXPERIENCED EMPLOYEES

GLOBAL SUPPLY CAPABILITY

Reliable service from inquiry to delivery

Galvanized product expertise, customization and quality control are aligned around every order.

01

Galvanized Expertise

Pipes, hollow sections, coils, sheets and profiled roofing supported by experienced production and export coordination.

02

Custom Solutions

Steel grade, zinc coating, surface treatment, processing, packaging and product specification tailored to the application.

03

Quality Assurance

Control from raw material selection and production through inspection, documentation and shipment.

Stable quality, competitive pricing and dependable service support repeatable global supply.

CORE GALVANIZED PORTFOLIO

Sixe core forms for galvanized supply

Zinc-coated steel products supplied for construction, fabrication and downstream processing applications.

01	Round Pipes	Zinc-coated circular hollow sections for structures and general fabrication.
02	Square Tubes	Clean-profile hollow sections for frameworks, gates, racks and construction.
03	Galvanized Coils	Continuous strip for forming, roofing, cladding and industrial components.
04	Galvanized Sheets	Flat zinc-coated products for panels, cabinets, ductwork and fabrication.
05	Roofing Sheets	Profiled sheets for roofing, wall cladding and industrial building systems.
06	PPGI/PPGL	Color-coated galvanized steel coils feature excellent corrosion resistance, weather resistance, and an attractive appearance, and are widely used in construction.

GALVANIZED HOLLOW SECTIONS

Galvanized Round Pipes

Zinc-coated round steel pipes for structural, mechanical and general fabrication applications.

- Uniform zinc protection with a clean finished surface
- Strong, practical hollow sections for fabrication and installation
- Steel grade, coating, surface, processing and packaging options

APPLICATIONS

Fencing · Scaffolding · Structural frames · General fabrication

CUSTOMIZATION SUPPORTED

GALVANIZED HOLLOW SECTIONS

Galvanized Square Tubes

Galvanized hollow sections with clean corners and reliable corrosion protection for fabricated structures.

- Consistent square profile and dependable straightness
- Zinc-coated surface for indoor and outdoor service
- Steel grade, coating, processing, end treatment and packaging options

APPLICATIONS

Frameworks · Gates · Racks · Construction

CUSTOMIZATION SUPPORTED

GALVANIZED ROLLED PRODUCTS

Galvanized Coils

Continuous galvanized strip for forming, stamping, roofing, cladding and downstream manufacturing.

- Stable strip quality for continuous processing
- Uniform zinc surface and controlled edge condition
- Coating, surface, slitting, treatment and packaging options

APPLICATIONS

Roofing · Cladding · Ducting · Formed components

CUSTOMIZATION SUPPORTED

GALVANIZED FLAT PRODUCTS

Galvanized Sheets

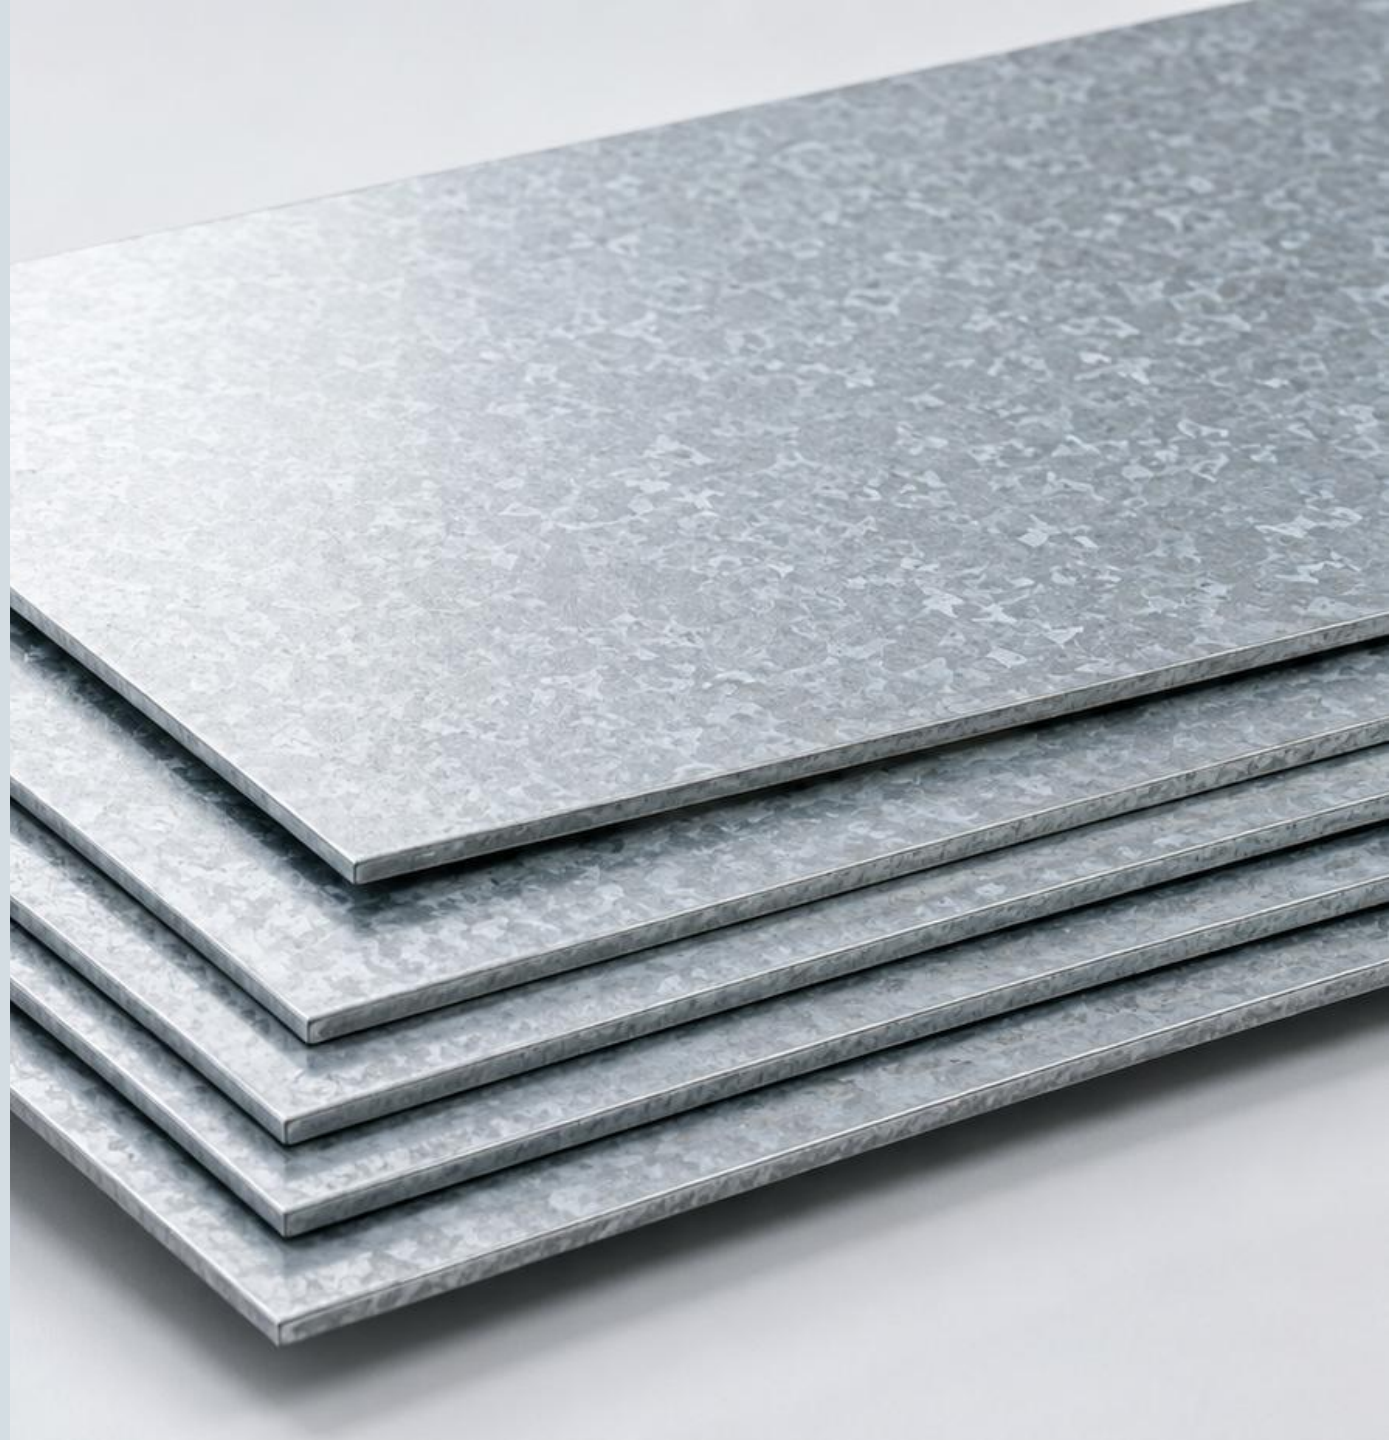

Flat galvanized sheets with consistent surface quality for fabrication, panels and industrial components.

- Reliable flatness and a clean zinc-coated surface
- Suitable for cutting, bending, stamping and welding
- Coating, surface, processing, film and packaging options

APPLICATIONS

Panels · Cabinets · Ductwork · General fabrication

CUSTOMIZATION SUPPORTED

PROFILED GALVANIZED PRODUCTS

Galvanized Roofing Sheets

Profiled galvanized sheets for durable roofing, wall cladding and industrial building systems.

- Defined corrugated or trapezoidal profiles
- Zinc-coated surface for weather-exposed applications
- Profile, coating, surface treatment and packaging options

APPLICATIONS

Roofing · Wall cladding · Warehouses · Agricultural buildings

CUSTOMIZATION SUPPORTED

COLOR-COATED GALVANIZED PRODUCTS

PPGI/PPGL

Pre-painted galvanized steel coils with durable color coatings for roofing, cladding and manufactured building products.

- Uniform color finish with excellent coating adhesion and surface consistency
- Zinc-coated steel substrate provides corrosion resistance and long service life
- Color, coating type, gloss, surface pattern and packaging options

APPLICATIONS

Roofing · Wall cladding · Sandwich panels · Home appliances

CUSTOMIZATION SUPPORTED

CUSTOMIZED SOLUTIONS & QUALITY

Built to your specification. Controlled at every step.

Our technical and quality teams align the product, process, inspection and packing plan before production.

CUSTOMIZATION

- Steel grade and zinc coating
- Surface treatment and passivation
- Slitting, cutting, profiling and fabrication
- Protective film, oiling and end treatment
- Inspection and documentation
- Order-specific packaging and labeling

QUALITY CONTROL

01

Raw material selection

02

Production and processing

03

Inspection and certification

04

Packing and final delivery

International quality certifications and industry qualifications support dependable global supply.

YOUR GLOBAL METAL PARTNER

Let's build your next galvanized order together.

High-quality products, professional service and long-term cooperation for customers around the world.
